SDK- Zoom in app purchase Manual

To be able to implement in app billing purchase over Zoom platform you need to go thru the following three main steps

Step one - web side configuration

- Upload your app over Zoom platform.
- Configure your app id, app secret and features require for your app, this information will be used for all actions require from your app over Zoom platform.

You can do these configuration while the uploading or on your app listing area by going to in app purchase button.

The screenshot displays the Zoom app configuration interface. At the top, there is a search bar and the Zoom logo with the tagline "Zoom online market place". The user's name "Mohammad" and "52 Points" are visible in the top right corner. The main configuration area includes:

- App ID:** A text input field with a "Generate Id" button.
- App Secret:** A text input field with a "Generate Secret" button.
- CallBack URL:** A text input field.
- Pricing:** A table with five levels, each with a checkbox, a name, a cost, and a recurring type.

	Name	Cost	Recurring
<input type="checkbox"/>	Level 1	10	One Time
<input type="checkbox"/>	Level 2	20	One Time
<input type="checkbox"/>	Level 3	40	One Time
<input type="checkbox"/>	Level 4	80	One Time
<input type="checkbox"/>	Level 5	100	One Time

A "Save" button is located at the bottom right of the configuration area.

Step two – App side configuration

- Once the app require to deduct from client points the app should call the following page <http://www.zoom.com/index.php/appPurchase/login/yourAppId/YourAppSeceretKey/appPrice/D/yourTransactionId>

*Transaction ID should be auto generate keys from Integer and characters with length not less than 8 chars and max to 16.

You are going to Authorize Demo App to deduct from your Balance X Points
